On October 15, 1855, the school opened its doors to its first class. Three students showed up, a number that gradually grew to 65 by 1858. In 1859, Anthony Maraschi, S.J., the founding president of St. Ignatius Academy, incorporated the institution under California state law, obtained a charter to issue college degrees, formed a board of trustees, and renamed the institution St. Ignatius College. Student enrollment, composed largely of first- and second-generation Irish and Italian immigrants, increased to 457 by 1862.

Further growth in the number of students and rising property taxes prompted St. Ignatius Church and College to move in 1880 to the corner of Hayes Street and Van Ness Avenue, the current site of the Louise M. Davies Symphony Hall. The college opened its doors to 650 students and rave reviews in the local press. The institution occupied a full city block and was described as having “scientific laboratories and departments” as “thoroughly equipped as money can make them” and a library that contained “the cream of knowledge on all necessary subjects.” The attached church was described as “magnificent” and could hold up to 4,000 people. In 1903, the college added a “splendid new gymnasium,” described as the best in the city.

The history of St. Ignatius Church and College at this location came to an abrupt end on April 18, 1906. On the morning of that day, an earthquake, followed by several days of fire, brought the church and college, and most of San Francisco, to almost complete ruin. The city and the institution, however, quickly rebuilt from the devastation. In September 1906, St. Ignatius Church and School reopened in temporary quarters, known as the “shirt factory,” on the southwest corner of Hayes and Shrader streets, currently the site of one of the buildings of St Mary’s Medical Center.
In 1927, St. Ignatius College moved into its new Liberal Arts Building, the present Kalmanovitz Hall, near the corner of Fulton and Parker Streets. In 1930, at the request of several alumni groups, St. Ignatius College changed its name to the University of San Francisco.

For 158 years, the University of San Francisco has served the citizens of San Francisco and enriched the lives of thousands of people. The institution has graduated students who went on to become leaders in government, education, business, journalism, sports, the sciences, and the legal and medical professions. Among its alumni, the university counts three San Francisco mayors, a United States Senator, four California Supreme Court Justices, a California Lieutenant Governor, two Pulitzer Prize winners, three Olympic medalists, several professional athletes, and the former president of Peru.

Today the University of San Francisco enrolls more than 10,000 students in its five schools and colleges: The School of Law, founded in 1912; the College of Arts and Sciences, organized in 1925; the School of Management, which began in 1925 as the College of Commerce and Finance and was merged with the College of Professional Studies in 2009; the School of Education, which started as the Department of Education in 1947 and was upgraded to a school in 1972; and the School of Nursing and Health Professions, which began as the Department of Nursing in 1948 and became a school in 1954. USF is one of the most ethnically diverse universities in the nation. Among the entire fall 2011 student population, 45 percent are Asian, African-American, Latino, Native Hawaiian/Pacific Islander, or Native American, and 14 percent are international.

Central to the mission of the University of San Francisco is the preparation of men and women to shape a multicultural world with generosity, compassion, and justice. The institution’s Vision, Mission, and Values Statement, approved by the Board of Trustees on September 11, 2001, after a year of formulation and campus-wide participation, captures the essence of this commitment in its opening paragraph: “The University of San Francisco will be internationally recognized as a premier Jesuit Catholic, urban University with a global perspective that educates leaders who will fashion a more humane and just world.” This mission permeates all aspects of the institution, including student learning and faculty development, curriculum design, program and degree offerings, alumni relations, publications, and a host of other institutional features.

In 2005, the University of San Francisco celebrated the 150th anniversary of its founding. The main USF campus currently occupies 55 acres near Golden Gate Park in San Francisco. In addition, the university offers classes at four Northern California branch campuses (Sacramento, San Jose, Santa Rosa and Pleasanton) at a Southern California branch campus, and at locations in downtown San Francisco and at the Presidio. The schools and colleges comprising the institution also offer students a multitude of international experiences and study-abroad programs that enrich the learning community and fulfill the university’s mission. The institution has grown dramatically since its modest beginning. It continues, however, to fulfill a mission that stretches back in time to the founding of the Society of Jesus in 1540 by St. Ignatius of Loyola, that took root in San Francisco in 1855, and that flourishes today in a premier Jesuit Catholic University.

CLASSIFICATION BY THE CARNEGIE FOUNDATION FOR THE ADVANCEMENT OF TEACHING:
USF is classified as a Doctoral/Research and Community Engaged University.

Under the Carnegie Foundation classification system, USF is characterized as balancing arts, sciences, and the professions at the undergraduate level; as doctoral/professional dominant at the graduate level; with the majority of its students being undergraduates; as selective, with a high level of transfer-in students; and as a medium-sized, four-year, and primarily residential institution. In 2008, USF received the community engagement classification in both possible categories, curriculum engagement and outreach and partnership.
USF was listed as a Tier One National University in the 2013 *U.S. News & World Report*, and was tied for 8th place in undergraduate student ethnic diversity, 6th for success in graduating low-income (Pell-Grant) students, and 10th for the percentage of international students among 281 national universities.

For the sixth straight year, USF was named to the President’s Higher Education Community Service Honor Roll by the Corporation for National and Community Service. This honor highlights USF students’ exemplary service on issues ranging from poverty and homelessness, to environmental justice. Honorees are chosen on the basis of the scope and impact of service projects, percentage of students participating in service activities, and the extent to which the school offers academic service-learning courses.

USF was selected as one of five universities in the nation to receive the 2012 Higher Education Civic Engagement Award from the Washington Center for Internships and Academic Seminars. USF was recognized for its contributions to the community, leadership and professional achievement, and enrichment of student learning. Fr. Privett was recognized at the Washington Center’s Award Gala on October 1, and USF will receive a $20,000 scholarship to support student participation in the Center’s programs.

The *Washington Monthly* ranked USF as 12th out of 258 national universities on a combined measure of the number of staff and students supporting community service.

The *Princeton Review* named USF one of the “Best Western Colleges” and San Francisco 6th in the nation for “Great College Towns.”

In 2012, Catholic Relief Services, the official international humanitarian agency of the U.S. Catholic Community, selected USF as a partner in a global solidarity educational effort that will, in the words of Fr. Privett, “promote a disciplined sensitivity to human suffering, especially among the poorest and most vulnerable members of the global village and an awareness of the particular applicability of key Catholic social tenets to poor populations in developing countries.”

USF Provost Jennifer Turpin was named by the *San Francisco Business Times* to the list of the most influential women in the Bay Area for the second straight year in 2012. The list recognizes 150 outstanding women professionals who make a difference in their companies, industries, and communities.

The USF’s School of Law was listed among the top tier law schools in the 2013 *U.S. News & World Report*, and was ranked among the top 10 law schools in the nation for Hispanics in 2009, 2010, and 2011 by Hispanic Business Magazine.

USF’s Masagung Graduate School of Management was named one of the 300 “outstanding institutions” in the 2012 edition of the *Princeton Review Annual Best Business Schools Guidebook*. The *Princeton Review* collected opinions of more than 19,000 students at AACSB accredited MBA programs around the world, as well as statistical information on MBA programs in order to give the readers the widest possible base of information for selecting the right business school.

USF was named by *G.I. Jobs Magazine* as a Military Friendly School for 2012, ranking USF in the top 15% of all colleges, universities, and trade schools nationwide.
As of September 7, 2012 (Census Date), the University of San Francisco enrolled 10,017 students, including 6,246 undergraduate students, 2,952 graduate students, 672 law students, and 147 special/non-degree students.

DAVID WOLBER, PROFESSOR, COMPUTER SCIENCE, COLLEGE OF ARTS & SCIENCES, was awarded an NSF grant entitled “Collaborative Research in Computational Thinking through Mobile Computing.” This collaborative project involves MIT, Wellesley College, the University of Massachusetts, Lowell and Trinity College, and is for three years in the amount of $565,836. USF’s award is for $94,839. The goal is to motivate more students to learn the fundamentals of computing by enabling them to build apps for phones and tablets. Additionally, he was awarded a $200,000 grant by the Kess Foundation to help further develop AppInventor and the Democratize Computing Lab at USF. Professor Wolber has received a host of awards, including a NSF grant, to support his groundbreaking research. His work is focused on bringing computing to the masses, educating all students about programming and computational thinking and using AppInventor and mobile devices as a platform. This grant will support his work to disseminate AppInventor as a “course in a box” that can be used at universities and high schools worldwide and refine the “App Inventor Gallery,” an open market akin to the App Store where educators and students can share their apps. This is being done in conjunction with MIT, where Professor Wolber will be spending part of his sabbatical next year.
